KDM5A fusion-hotspot benchmark report

Study: msk_impact_50k_2026

Abstract

This report analyzes KDM5A gene fusions from the msk_impact_50k_2026 study, covering 10 fusion events. 3/10 fusions (30.0%) were in-frame. 5/10 fusions (50.0%) retained the PF08429 domain. Domain retention was tested with Fisher's exact test (p=0.119048, not statistically significant at alpha=0.05). No literature benchmark is configured for KDM5A.

Results summary

Fusion partner frequency

Fusion-partner frequency was tabulated across 10 analyzed fusion events, identifying 9 distinct fusion partner genes. The most frequent partner was NINJ2, observed in 2 events.

Domain retention

PF08429 domain retention was tested with Fisher's exact test comparing in-frame fusions against all others; 3/3 (100.0%) of in-frame fusions retained the domain, p=0.119048 (not statistically significant at alpha=0.05). A breakpoint-position permutation test produced a corroborating empirical p-value of 0.237624.

Domain disruption

Domain-disruption analysis was skipped: KDM5A has no disruption_required_domains configured; domain-disruption analysis was skipped.

Cutpoint detection

Cutpoint detection scanned 9 mapped breakpoints for the protein position that best separates domain-retained from lost/disrupted fusions; the inferred cutpoint was position 1311 aa (permutation-corrected p=0.267327, not statistically significant at alpha=0.05). This is 94 aa from the nearest configured domain boundary at 1217 aa.

Corroborating confidence statistics

Corroborating confidence statistics were not computed for this run: KDM5A has no group_field configured; confidence-stats analysis was skipped.

Composite evidence score

Composite evidence score reported: domain_disruption sub-score excluded: the supplied result had no applicable p-value (e.g. disruption_required_domains not configured for this gene).

Exon retention

Exon retention reported: No target exon was supplied in params or GeneConfig.

Joint partner

Joint partner reported: KDM5A has no gene_pair configured; joint-partner analysis was skipped.
