

ETV6 fusion-hotspot benchmark report

Study: msk_impact_50k_2026

Abstract

This report analyzes ETV6 gene fusions from the msk_impact_50k_2026 study, covering 90 fusion events. 64/90 fusions (71.1%) were in-frame. 68/90 fusions (75.6%) retained the PF02198 domain. Domain retention was tested with Fisher's exact test ($p=5.12326e-06$, statistically significant at $\alpha=0.05$). No literature benchmark is configured for ETV6.

Results summary

Fusion partner frequency

Fusion-partner frequency was tabulated across 90 analyzed fusion events, identifying 27 distinct fusion partner genes. The most frequent partner was NTRK3, observed in 55 events.

Domain retention

PF02198 domain retention was tested with Fisher's exact test comparing in-frame fusions against all others; 58/64 (90.6%) of in-frame fusions retained the domain, $p=5.12326e-06$ (statistically significant at $\alpha=0.05$). A breakpoint-position permutation test produced a corroborating empirical p-value of 0.00990099.

Domain disruption

Domain-disruption analysis was skipped: ETV6 has no disruption_required_domains configured; domain-disruption analysis was skipped.

Cutpoint detection

Cutpoint detection scanned 88 mapped breakpoints for the protein position that best separates domain-retained from lost/disrupted fusions; the inferred cutpoint was position 155 aa (permutation-corrected $p=0.425743$, not statistically significant at $\alpha=0.05$). This is 32 aa from the nearest configured domain boundary at 123 aa.

Corroborating confidence statistics

Corroborating confidence statistics were not computed for this run: Algorithm failed: ValueError: params['group_field'] is required

Composite evidence score

Composite evidence score reported: domain_disruption sub-score excluded: the supplied result had no applicable p-value (e.g. disruption_required_domains not configured for this gene).

Exon retention

Exon retention reported: No target exon was supplied in params or GeneConfig.

Joint partner

Joint partner reported: Algorithm failed: ValueError: joint_partner requires a GeneConfig with gene_pair
